

## LANDSCAPE CONSTRUCTION

### *Genus Loci's construction division*

***builds durable, high quality landscapes that fulfill - and often exceed – our clients' expectations***

We offer a complete range of “hard” and “soft” landscape construction services. As a full service contractor, we will tackle projects of any size, and have the skill and experience required to implement complex designs involving multiple trades. Genus Loci is highly adept at undertaking projects for challenging sites with restricted access, difficult terrain and environmental constraints. We handle most aspects of the work “in-house”, and if necessary, employ only reputable and reliable sub-contractors who adhere to our strict quality and workmanship standards.

Continuous on-site supervision and coordination is integral to our quality control procedures. Each of our projects is rigorously overseen by a construction foreman in collaboration with the project designer, project manager and project supervisor, ensuring a smooth transition from paper to reality.

Once we've completed a project, we provide clients with plant care packages and maintenance manuals so you understand how to take care of your landscape over the short and long terms. We are always available to discuss issues and concerns that arise over time, and, as our many satisfied clients will attest, we always honour our warranties.

Genus Loci is currently one of only a handful of Canadian landscape contractors building **Natural Swimming Pools**, a new and increasingly popular alternative to conventional pools. Natural Swimming Pools are chlorine and chemical free, relying on a combination of mechanical, plant, and biological filters to maintain water quality. These remarkable pools look and function like natural ponds, but with the advantage of fresh, unadulterated, crystal clear swimming water.

### Genus Loci's Landscape Construction Services Include:

- Site Excavation and Grading
- Natural and Interlocking Stone Pavements and Retaining Walls
- Outdoor Kitchens
- Ornamental Ponds and Water Features
- Fine Landscape Carpentry and Woodworking
- Natural Swimming Pools
- Green walls, green roofs, and rooftop gardens
- Tree, Shrub, and Perennial Planting
- Shoreline Stabilization, Bioengineering, and Ecological Restoration
